

PRMS ARCHITECTURE LAB

Institutional Records — 2021–2026

Version 1.0 | 2026

Purpose of the Record

This document provides a concise chronological and documentary record of the development of PRMS Architecture Lab. It is intended to preserve institutional continuity and provide traceable evidence of research activity, outputs, infrastructure, and organizational development.

Institutional Timeline

2021 — Renewable Horizons begins editorial production and develops a corpus of work related to renewable energy systems, distributed infrastructures, and sustainability.

2024 — PRMS Architecture Lab is formally established as an institutional research unit. The PRMS framework is developed as a structured and measurable architectural system.

2025 — The PRMS research corpus expands through books, preprints, conceptual documents, methodological development, and persistent research records.

2026 — Public consolidation of the institutional website and research infrastructure; expansion of PRMS publications and research documentation; development of PRMS Score; development of PRMS AI research infrastructure; public declaration of institutional identity and affiliation; ROR registration process initiated.

Institutional Evidence Categories

Identity — public institutional name, definition, location, director, affiliation string, and institutional ID.

Research — publications, preprints, research documents, research questions, methodological development, and research areas.

Persistent Records — DOI and Zenodo records associated with research outputs.

Researcher Identity — ORCID-linked researcher identity and research profile.

Research Infrastructure — public website, GitHub repositories, digital deployment infrastructure, PRMS AI research infrastructure, and associated documentation.

Applied Evidence — projects, prototypes, measured performance, simulations, and validation records.

Research Dialogue — documented external contributions and interdisciplinary discussions.

Institutional Development — structure, network, continuity, and future organizational identification.

Current Institutional Record

Official name: PRMS Architecture Lab

Type: Independent Research Unit

Location: Querétaro, México

Established: 2024

Research activity: active since 2021

Founder & Research Director: Oscar A. Hernández García

ORCID: 0009-0005-2474-4834

Institution ID: PRMS-ARL-001

Public affiliation: PRMS Architecture Lab, Querétaro, México

ROR: registration process in progress; ID to be assigned.

Current Research Evidence

The public research record includes PRMS framework documents, publications and preprints, the PRMS Score research standard, research dialogue contributions, and the development of PRMS AI as an emerging research infrastructure. The institutional website identifies the Lab as responsible for advancing, validating, and applying the PRMS framework and documents its research areas, outputs, structure, and infrastructure.

Institutional Development Status

Identity: Established

Research: Active

ORCID: Established

DOI / Zenodo: Active

Research network: Developing

Digital infrastructure: Active / Developing

Applied validation: Active

ROR: In process

Continuity: Developing

Record Maintenance

New institutional milestones, research outputs, affiliations, collaborators, identifiers, and major infrastructure changes should be added to subsequent versions. Records should preserve dates, source documents, persistent identifiers, and version information whenever available.

Status of this Document

Version 1.0 — Initial institutional record. This document is an institutional record of research development. It is not a legal registration, accreditation, certification, or ROR record.
